

Opportunity of deregulation awaits; Commerce Energy partners with 1Voice

How would you like to make money every time your customer turns on the lights or fires up the gas stove? With 1Voice Worldwide, and with the deregulation of energy markets in several states, that opportunity is here today!

1Voice is an authorized marketing agency for Commerce Energy in Texas electric markets and Ohio natural gas markets. Commerce Energy's full range of residential and small business service plans are marketed through the thousands of 1Voice independent business owners.

When customers pick an alternative energy supplier, there is no change in the reliability of their service. The utility company will continue to read the

meter and respond to outages or emergencies – just as they have always done. All that changes is the opportunity to lock in a fixed rate that offers protection from volatile energy prices. And, if you are a 1Voice independent business owner, you make money every time someone turns on the lights, cooks dinner or heats or cools their home.

Ohio Market

Ohio residents and small business owners have been able to choose an alternative natural gas supplier since 1997. In Ohio, those who stay with the local natural-gas utility are subject to volatile pricing, which changes every month. Commerce Energy offers natural gas consumers a fixed rate for one to two years, so they can lock in a rate and help manage their energy costs by protecting the price they pay for their natural gas.

About Commerce Energy:

Commerce Energy Group, Inc. is a leading independent U.S. electricity and natural gas marketing company, publicly traded on the American Stock Exchange (Amex) under the symbol: EGR. Commerce Energy currently operates in 10 states and serves 194,000 customers. For a decade, customers have relied on Commerce Energy to deliver quality electric and natural gas services, in addition to competitive pricing, innovative product offerings and personalized customer care. Headquartered in Orange County, California, the company also has offices in Dallas and Houston, Texas, and Boston, Massachusetts.

Texas Market

Texas deregulated electricity markets in 2002. In deregulated markets, consumers who stay with the company formerly affiliated with the utility may be paying higher than market rates. Customers who choose Commerce Energy for their residential service receive an "All-In Rate" that includes one price per unit of electricity and no monthly fee. This means there are no surprises – it's the same rate per unit of electricity regardless of how much they use, and there are no seasonal price adjustments.* Small business customers can also benefit from Commerce Energy's easy-to-understand terms and competitive electricity prices.

*Price can only increase for changes in law or regulatory charges.

High Growth Opportunity

Just how big an opportunity are the energy markets? Here's just one example. If Texas was an independent country, the energy used in its deregulated markets would make it the 13th largest user of electricity in the world.**

Currently, this 1Voice opportunity is focused on Texas and Ohio only. But, as Commerce Energy expands its presence into other energy markets across the country, 1Voice will have the opportunity to expand as well.

Positive Partnership

"We're excited to be working with 1Voice. Their representatives bring together a solid, ever-growing group of sales people who share our vision that energy can be sold efficiently through network marketing," said Thomas Ulry, Commerce Energy's senior vice president of Sales & Marketing. "In the competitive world of retail energy, it's important to touch customers in a variety of ways. Network marketing is another way for consumers to learn about the benefits of our service plans and enroll in a convenient, customer-friendly environment."

"We're impressed with Commerce Energy and their understanding of and belief in the power of network marketing," said Ken Robinson, 1Voice Co-Founder. "Adding the growth opportunity of energy to an existing array of highly sought-after telecom and Internet products will accelerate our company's growth plans."
